

HIRMEC 2001

- **What are the new themes of our science?**
 - How can we make them more focused and effective?
- **What are the new research opportunities?**
 - Are there logical common initiatives that we should pursue?
- **New environment requires rethinking of our priorities:**
 - Development of rare isotope facilities.
 - Completion of RHIC.
 - Redirection of low energy and hadron program.
- **It's a workshop: Let's work on these issues together!**
 - The discussion sessions are there for you to use.
 - Contact the session chair if you want some time.
